PRODUCTS & SERVICES

- **Cloudflare Compute**

A serverless platform for building and deploying applications at the edge of the network, reducing latency and improving performance.

- **Cloudflare Security**

A suite of security services, including DDoS protection, web application firewall, and SSL encryption, to protect websites and applications from threats.

- **Cloudflare Network**

A global network of data centers and edge locations, providing fast, secure, and reliable connectivity for websites and applications.

AI-GENERATED PAIN POINTS

• **Cybersecurity threats**

Cloudflare's customers face a range of cybersecurity threats, including DDoS attacks, malware, and phishing, which can compromise their online presence and reputation. Cloudflare's security services, such as DDoS protection and web application firewall, help to mitigate these threats and ensure the security and integrity of their customers' websites and applications.

• **Performance and latency**

Websites and applications that are slow to load or respond can lead to a poor user experience, lost revenue, and damage to reputation. Cloudflare's edge computing and content delivery network (CDN) help to reduce latency and improve performance, ensuring that customers' online presence is fast, secure, and reliable.

COMPETITOR ANALYSIS

Company Name	Website	AI Reasoning
Akamai	https://www.akamai.com/	Akamai is a competitor to Cloudflare in the content delivery network (CDN) and cybersecurity markets, offering similar services to improve website performance and security.
Imperva	https://www.imperva.com/	Imperva is a competitor to Cloudflare in the cybersecurity market, offering a range of services, including DDoS protection, web application firewall, and CDN, to protect websites and applications from threats.
