## COMPANY SUMMARY

---

Stripe is a financial services platform that helps businesses accept payments, build flexible billing models, and manage money movement. The company provides a comprehensive set of payments and financial tools to grow revenue, with support for 135+ currencies and payment methods. Stripe's platform is designed to work individually or together, with features such as automated billing, invoicing, and revenue recognition. The company has a strong focus on security, with a Level 1 PCI Service Provider certification and AI-powered fraud protection.

## TARGET AUDIENCE / MARKET

## PRODUCTS & SERVICES

---

- **Payments**

A payment processing system that allows businesses to accept a wide variety of payment types online and in-person.

- **Billing**

A billing system that automates invoicing, payments, and revenue recognition for businesses.

- **Radar**

A fraud detection system that uses AI-powered technology to protect businesses from fraudulent transactions.

- **Terminal**

A point-of-sale system that allows businesses to accept in-person payments.

- **Connect**

A platform that enables businesses to manage payouts to multiple recipients.

• **Sigma**

A data analytics platform that provides businesses with insights into their payment and revenue data.

**AI-GENERATED PAIN POINTS**

• **Payment processing**

Businesses often struggle with payment processing, including high transaction fees, limited payment options, and security concerns. Stripe's payment processing system is designed to address these pain points by providing a secure, flexible, and cost-effective solution.

• **Billing and invoicing**

Businesses often find billing and invoicing to be time-consuming and prone to errors. Stripe's billing system automates these processes, reducing the risk of errors and freeing up staff to focus on other tasks.

• **Fraud detection**

Businesses are increasingly vulnerable to fraudulent transactions, which can result in significant financial losses. Stripe's Radar system uses AI-powered technology to detect and prevent fraudulent transactions, providing businesses with an additional layer of protection.

**COMPETITOR ANALYSIS**
